Ms. Kim Davis
Agent for EZ-JECT, Inc
c/o RegWest Company, LLC
8209 West 20th St., Suite B
Greeley, CO 80634-4699

Subject: Label Amendment – add container sizes and change product name
Product Name: EZ-JECT Diamondback Herbicide Shells
EPA Registration Number: 83220-1
Application Date: 01/15/18
Decision Number: 546749

Dear Ms. Davis:

The amended label referred to above, submitted in connection with registration under the Federal Insecticide, Fungicide and Rodenticide Act, as amended, is acceptable. This approval does not affect any conditions that were previously imposed on this registration. You continue to be subject to existing conditions on your registration and any deadlines connected with them.

A stamped copy of your labeling is enclosed for your records. This labeling supersedes all previously accepted labeling. You must submit one copy of the final printed labeling before you release the product for shipment with the new labeling. In accordance with 40 CFR 152.130(c), you may distribute or sell this product under the previously approved labeling for 18 months from the date of this letter. After 18 months, you may only distribute or sell this product if it bears this new revised labeling or subsequently approved labeling. “To distribute or sell” is defined under FIFRA section 2(gg) and its implementing regulation at 40 CFR 152.3.

Should you wish to add/retain a reference to the company’s website on your label, then please be aware that the website becomes labeling under the Federal Insecticide Fungicide and Rodenticide Act and is subject to review by the Agency. If the website is false or misleading, the product would be misbranded and unlawful to sell or distribute under FIFRA section 12(a)(1)(E). 40 CFR 156.10(a)(5) list examples of statements EPA may consider false or misleading. In addition, regardless of whether a website is referenced on your product’s label, claims made on the website may not substantially differ from those claims approved through the registration process. Therefore, should the Agency find or if it is brought to our attention that a website contains false or misleading statements or claims substantially differing from the EPA approved registration, the website will be referred to the EPA’s Office of Enforcement and Compliance.

Your release for shipment of the product constitutes acceptance of these conditions. If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA section 6. If you have any questions, please contact Beth Benbow via email at Benbow.bethany@epa.gov.

Sincerely,

Emily Schmid

Emily Schmid, Acting Product Manager 25

EZ-JECT™ Diamondback Herbicide Shells

{Cardboard Box}

GLYPHOSATE GROUP 9 HERBICIDE

Water-Soluble Herbicide in Shells for Trunk and Stem Injection
Controls Undesirable Woody Brush, Trees and Vines – Roots and All

Active Ingredient:

Glyphosate, N-(phosphonomethyl) glycine, in the form of its isopropylamine salt (CAS No. 38641-94-0).....	83.5%
Other Ingredients	<u>16.5%</u>
Total	100.0%

**Keep Out of Reach of Children
CAUTION**

See below for First Aid and additional Precautionary Statements.

Net Contents: 25 [50] [100] [250] [600] [1200] Shells
Shell Net Wt: 0.01 oz (0.28 g)
Total Net Wt: 0.25 oz (7 g) [0.5 oz (14 g)] [1 oz (28 g)] [2.5 oz (71 g)] [6 oz (170 g)] [12 oz (340 g)]

EPA Reg. No. 83220-1

EPA Est. 69117-NE-1

First Aid

If Swallowed: Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by a poison control center or doctor. Do not give anything by mouth to an unconscious person.

If in Eyes: Hold eye open and rinse slowly and gently with water for 15 to 20 minutes. Remove contact lenses, if present, after the first 5 minutes then continue rinsing eye.

Call a poison control center or doctor for treatment advice.

Have the product container or label with you when calling a poison control center or doctor, or going for treatment.

PRECAUTIONARY STATEMENTS

Hazards to Humans & Domestic Animals

CAUTION: Harmful if swallowed. Causes moderate eye irritation. Avoid contact with eyes or clothing. Wear long-sleeved shirt and long pants, socks and shoes.

Environmental Hazards

Do not apply directly to water, to areas where surface water is present or to intertidal areas below the mean high water mark. Do not contaminate water when cleaning equipment or disposing of equipment wash waters.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

User Safety Recommendations

Users should: Thoroughly wash hands after handling before eating, drinking, chewing gum, using tobacco or using the toilet. Remove clothing immediately if pesticide gets inside, then wash thoroughly and put on clean clothing.

Product Information

This product is for woody brush, tree and vine control in all non-cropland sites including forestry, roadsides, rights-of-way, industrial, residential, fencerows, railroads and aquatic sites. Woody vegetation may be controlled by injection of E-Z-Ject selective injection herbicide shells.

This product moves throughout the tree, brush or vine from the point of injection to all roots and shoots. Symptoms appear gradually (normally within 4 to 8 weeks) beginning with wilting, yellowing and browning of the foliage. This is followed by deterioration of all roots and shoots.

For aquatic sites, this product may be injected into stems of trees and brush standing in water or wetlands. Do not apply directly to water or inject into stems below the water level.

Resistance Management Recommendations

For resistance management, EZ-Ject Diamondback Herbicide Shells is a Group 9 herbicide. Any weed population may contain or develop plants naturally resistant to EZ-Ject Diamondback Herbicide Shells and other Group 9 herbicides. The resistant biotypes may dominate the weed population if these herbicides are used repeatedly in the same area. Appropriate resistance-management strategies should be followed.

To delay herbicide resistance, take one or more of the following steps:

- Rotate the use of EZ-Ject Diamondback Herbicide Shells or other Group 9 herbicides within a growing season sequence or among growing seasons with different herbicide groups that control the same weeds the area.
- Adopt an integrated weed-management program for herbicide use that includes scouting and uses historical information related to herbicide use and crop rotation, and that considers tillage (or other mechanical control methods), cultural (e.g., higher crop seeding rates; precision fertilizer application method and timing to favor the crop and not the weeds), biological (weed-competitive crops or varieties) and other management practices.
- Scout after herbicide application to monitor weed populations for early signs of resistance development. Indicators of possible herbicide resistance include: (1) failure to control a weed species normally controlled by the herbicide at the dose applied, especially if control is achieved on adjacent weeds; (2) a spreading patch of non-controlled plants of a particular weed species; (3) surviving plants mixed with controlled individuals of the same species. If resistance is suspected, prevent weed seed production in the affected area by an alternative herbicide from a different group or by a mechanical method such as hoeing or tillage. Prevent movement of resistant weed seeds to other areas by cleaning harvesting and tillage equipment when moving between areas, and planting clean seed.
- If a weed pest population continues to progress after treatment with this product, discontinue use of this product and switch to another management strategy or herbicide with a different mode of action, if available.

- Contact your local extension specialist or certified crop advisors for additional pesticide resistance-management and/or integrated weed-management recommendations for specific crops and weed biotypes.
- For further information or to report suspected resistance, contact EZ-Ject, Inc. representatives at 888-395-6732.

Application Instructions

Inject the shells using only E-Z Ject shell injection equipment. The shells must penetrate through the outer bark into living phloem tissue to provide effective results.

For trees with less than 2.5 inch DBH (diameter at breast height), inject one shell per stem. Inject one shell every 4 inches, evenly around the trunk of the tree, below all major branches. Trees, brush and vines may be injected at any time of the year except when wood is frozen.

Weedy Brush, Trees and Vines Controlled

This product will control the following species:

- | | | |
|------------------|------------------|---------------------|
| • Alder | • Eucalyptus | • Poison oak |
| • Ash | • Hackberry | • Ponderosa pine |
| • Aspen, quaking | • Hawthorn | • Poplar |
| • Big-leaf maple | • Hazel | • Poplar, yellow |
| • Birch | • Hemlock | • Redbud |
| • Black cherry | • Hickory | • Sagebrush |
| • Cascara | • Locust, honey | • Sassafras |
| • Ceanothus | • Lodgepole pine | • Sourwood |
| • Chamise | • Madron | • Sumac |
| • Cherry | • Manzanita | • Sweet gum |
| • Cottonwood | • Maple | • Tan oak |
| • Dogwood | • Mountain maple | • Vine maple |
| • Douglas fir | • Oak | • Waxmyrtle |
| • Elderberry | • Persimmon | • Western red cedar |
| • Elm | • Pin cherry | • Willow |
| | • Poison ivy | |

Storage and Disposal

Do not contaminate water, foodstuffs, feed or seed by storage or disposal.

Pesticide Storage: Keep container closed to prevent spills and contamination. At the end of each use period, remove unused shells from EZ-Ject shell injection system. Replace unused shells in original container and re-seal. Store with the open end of the shell pointing up. **Pesticide Disposal:** Wastes resulting from the use of this product that cannot be used or chemically reprocessed must be disposed of in a landfill approved for pesticide disposal or in accordance with applicable Federal, state and local procedures. **Container Handling:** Non-refillable container; do not reuse or refill this container. Triple rinse (or equivalent) container then offer for recycling, if available; otherwise, discard in trash.

{Per PR Notice 2007-4 the batch code/lot number will appear on the label or container.}

Limit of Warranty and Liability

EZ-Ject, Inc. warrants that this product conforms to the chemical description on the label and is reasonably fit for the purposes set forth in the complete Directions for Use when used in accordance with those Directions under the conditions described therein. NO OTHER EXPRESS WARRANTY OR IMPLIED WARRANTY OF FITNESS FOR A PARTICULAR PURPOSE OR MERCHANTABILITY IS MADE. This warranty is also subject to the conditions and limitations stated herein. Buyer and all users shall promptly notify this Company of any claims whether based in contract, negligence, strict liability, tort or otherwise.

To the extent consistent with applicable law, the exclusive remedy of the user or buyer, and the limit of the liability of this company or any other seller for any and all losses, injuries or damages resulting from the use or handling of this product (including claims based in contract, negligence, strict liability, other tort or otherwise) shall be the purchase price paid by the user or buyer for the quantity of this product involved, or at the election of the company or any other seller, the replacement of such quantity, or if not acquired by purchase, replacement of such quantity. To the extent consistent with applicable law, in no event shall this company or any other seller be liable for any incidental, consequential or special damages.

Upon opening and using this product, buyer and all users are deemed to have accepted the terms of this LIMIT OF WARRANTY AND LIABILITY which may not be varied by any verbal or written agreement. If terms are not acceptable, return at once unopened.

Product protected by U.S. Patent No. 4,405,531. No license granted under any non-U.S. patent(s).
